## Clinical Information Form Anti-TSH, anti-T3 and anti-T4 antibodies

### INTERNATIONAL DIVISION

17/19, avenue Tony Garnier - BP 7322 - 69357 Lyon cedex 07

Tel.: +33 (0)4 72 80 23 85 - Fax: +33 (0)4 72 80 73 56 - E-mail: [international@eurofins-biomnis.com](mailto:international@eurofins-biomnis.com)

Testing for anti-hormone antibodies (TSH, T3, T4) is indicated only **to identify suspected analytical interference in thyroid hormone assays.**

In order to justify the prescription of this testing and the provision of advice, it is necessary to provide the following clinical and biological information:

**Results of thyroid examination (or thyroid workup) results suggestive of analytical interference** (*attach the report or if necessary fill out the form below*)

- ▶ **Attached report**
- ▶ **If no report available**

- **TSH =** ..... **mIU/L** (technique used: ..... )
- **FT4 =** ..... **pmol/L** (technique used: ..... )
- **FT3 =** ..... **pmol/L** (technique used: ..... )

### FOR THE CLINICIAN

The patient has:

☐ euthyroidism

☐ hypothyroidism

☐ hyperthyroidism

Is the patient being treated with thyroid hormones?

☐ YES

At what dosage: .....

☐ NO

### FOR THE CLINICAL BIOLOGIST OR CLINICIAN

Verification of workup results with another assay technique? (*provide the results*)

Existence of a previous normal thyroid workup?
