

Press release

A new identity for a new phase

Lyon, 03 October 2016. Just one year ago, Biomnis joined the French group of laboratories Eurofins Scientific. Founded in Nantes in 1987, Eurofins Scientific is a leading international player in the field of bio-analysis and one of the world leaders in the field of genomic services.

As the standard-bearer of the "Clinical Diagnostics" division of Eurofins Scientific in Europe, Biomnis is today proud to unveil its new logo:

Through this new identity, the European leader in specialized clinical pathology reaffirms its ambition within the Eurofins group: to use its unrivalled technological and scientific know-how to expand its portfolio of specialized and innovative tests, while simultaneously strengthening its international presence.

Eurofins Biomnis: 120 years of expertise and innovation in the service of the health of tomorrow's world.

About Eurofins Biomnis

European leader in the sector of specialized medical pathology, Eurofins Biomnis carries out over 32,000 analyses per day from a range of over 2,500 available tests, including specialized tests for which the company has the appropriate authorizations.

Founded in 1897 by Marcel Mérieux, Eurofins Biomnis remains the leader in the field of specialized medical pathology in France. It has kept its position through continuous technological innovation and investment, particularly in areas such as female biology, oncology and personalized medicine, as well as chromosomal and molecular genetics.

With 120 years of expertise and innovation in the service of medical pathology, Eurofins Biomnis is the core of the Clinical Diagnostics division in Europe and has its eyes set on its international development.

About Eurofins

Eurofins Scientific is the world leader in food, environment and pharmaceutical products testing. It is also among the largest global providers of central laboratory services and predictive pharmacology, as well as genomic and agrosience services. In addition, Eurofins is one of the key emerging players in specialty clinical diagnostic testing in Europe and the USA.

With a workforce of more than 25,000, a network of more than 200 laboratories in 39 countries, and a rich portfolio of more than 130,000 analytical methods to validate the safety, identity, composition, authenticity, origin and purity of biological substances and numerous products, the group offers its clients high-quality analytical services, quick and reliable results, and consultancy services provided by highly-qualified experts.

The group plans to pursue a development strategy based on the continuous expansion of its technology portfolio and its geographic reach. Through R&D programs and acquisitions, the group draws on the latest technological developments, which enable it to offer its clients an unrivalled range of analytical solutions and the most comprehensive range of testing methods. As one of the most innovative international players in its industry, Eurofins is ideally positioned to meet the increasingly stringent quality and safety requirements of its clients and of regulatory agencies worldwide.
